

									Would it be useful for the FG Directory to have a references/useful contacts tab with links to organisations who may be able to help with sustainable design and delivery of construction projects?
ID	Start time	Completion time	Email	Name	A series of workshops with the pilot projects have been held, can you recall which of these FG Directory workshops did you attend	Do you manage one of the pilot projects which took part in the review?	Having attended the workshops and hearing how the pilot projects have progressed, how would you rate your awareness of the Future Generations Directory now?	Having observed the FG Directory being applied to a project, do you feel the FG Directory would work best	Will you continue to use the FG Directory on your C21 school projects?

Within your Authority, what other construction projects do you feel could make use of the FG Directory to demonstrate compliance with the Act?		Who do you feel would be best to be custodian of the FG Directory and support its expansion beyond C21 schools to all construction works procured by Local Authorities in Wales, and other public se...	If 'other' ticked in question 9 please specify below	Would you be willing to discuss your responses in more detail with CEWales?	Contact details provided relating to question 11	Authority

21C	n/a	Future Generation Commissioners Office	-	No thank you		
Both housing and schools projects could use this approach	No	CEWales	n/a	Yes - contact details provided below		
Aeron Valley New Area School	It feels like a lot of the questions asked in the various RIBA stages are repeated, however, if this is changed to 4 project stages, this could be resolved.	CEWales	.	Yes - contact details provided below		
Regeneration projects such as the new Leisure and Wellbeing Facility which I am piloting in the current FG Directory workshops.	Suggested improvement - to reference each of the evidence criteria in a similar way to BREEAM.	CEWales	n/a	Yes - contact details provided below		
Larger capital scheme that are managed by other departments eg Social Services	None	CLAW	N/A	No thank you		
Regeneration Leisure	NA	CEWales	NA	No thank you		
Most projects could benefit from the directory, as it clearly breaks down expectations at each stage.	The directory needs to be unlocked or the final column should be unlocked to add in hyperlinks and comments. I also find it useful to be able to colour code the items that are completed and if I have enough evidence yet (e.g. just drafts available)	CEWales	n/a	No thank you		
All engineering, infrastructure and landscaping projects - which the current RIBA stage approach will not work with.						
If you rename the 4 stage approach to Feasibility, Design/Planning, Construction/Implementation and Operation - pretty much *everything* can be covered with the same approach. It provides consistency and simplicity across all areas of operation which are project-based, whether they involve physical works or not.	The last time I saw it, it was still using the RIBA fee stage principle, which I think is overly technical, overly specific, too complex and requires too much jargon and collection of too much data that will not necessarily exist. I have a version of the 4 stage approach which I will be using instead.	Other (please specify below)	Welsh Government. They can implement and manage data from the public and private sector .	Yes - contact details provided below		
Not sure	No Comments	CEWales	N/A	No thank you		
As long as the Directory is used from the very inception of a project, then there will be benefit on any project over a certain value.	The 0-8 Stages don't sit easy with me. The Directory should either fully align with the RIBA Stages (demolition being RIBA Stage 0 - inception of a new project) or change to Feasibility, Design, Construction, In-use.	Future Generation Commissioners Office	N/A	No thank you		
Projects under the 21c schools programme	No, I haven't use it enough	CEWales	N/A	No thank you		
Not sure at the moment, but there could be some.	No	CEWales	N/A	No thank you
